

# Solve the equation $4+0.3x=19$

## Answer 1

Answer: Step #1). Subtract 4 from each side of the equation.

Step #2). Divide each side by 0.3 .

At this point, be careful. The answer will jump up off the paper into your face.

## Answer 2

Answer:

$$4+0.3x=19$$

$$0.3x=19-4$$

$$0.3x=15$$

$$x=15/0.3$$

$$x=50$$
